## Metal Spider Chairs

### DESCRIPTION

Metal spider bar chairs or wire bar chairs are perhaps the earliest known method of supporting reinforcing in concrete. The 4-legged, factory welded, steel chair has a indentation in the top to support rebar or mesh.

The chairs legs are dipped in a light grey plastic to prevent rust and to provide minimal exposure on precast and off-form concrete. Their strong and stable construction makes them ideal for use in precast, tilt-up, suspended and off-form applications.

For slab-on-ground applications, a metal “Pizza” plate can be used to support the chair preventing the chairs from sinking into the sub-base.

### FEATURES & BENEFITS

- Strong and Stable
- Plastic feet prevent rust and provide minimal exposure in off-form work
- Can be tied to reinforcing for vertical spacing
- Available in a large range of sizes

### DISCLAIMER

Set-Up products are manufactured to the highest quality, and if used in the correct applications and in accordance with all directions, will produce quality and consistent results. However Allcon Group Pty Ltd accepts no responsibility for inappropriate usage or faulty workmanship by the end user.

Product: Set-Up Metal Spider Chairs  
Issue Date: 9 October 2020
